

EagleEye

AI-powered video analytics solution

Key Features

Face Detection

Accurately identifies individual faces in real time, even in low-light or crowded environments.

Person Tracking

Tracks individuals throughout the monitored area, providing insights into their movements and behavior.

Uniform Violation Detection

Identifies individuals not wearing required uniforms or identification badges, ensuring adherence to organization policies.

Restricted Area Violation Detection

Alerts authorities to unauthorized access in restricted areas and sends immediate notifications to ensure security.

PPE Kit Violation Detection

Detects missing or improper PPE and alerts security to maintain safety compliance.

Analytics and Reporting

Generates detailed reports for data-driven insights and decision-making.

Versatile Integration

The system works with live streams, pre-recorded videos, and CCTV footage
