Stage

Manages classification of prisoners and staging system based on age, character & criminal record

Discipline

This module provides functionality for disciplining offender including appeals

Station

This module provides functionalities for gate management, deployments, shifts, occurrences and incidents

Medical

Manages Medical examination, treatments, and security of records.

Gate Management

Manages inner gate and out campus gate details keeping records for in punch out punch of prisoners, record in out of property and manage visitors.

Transfer Management

This module handles the transfer of prisoners from one station to another. It also provides functionality for managing lodgers and out stations.

Discharge

Manages the discharge process of prisoners under different situations i.e. release on license for habitual offenders, normal discharges, escapes, death, intended place of stay, transport etc.

Social Rehabilitation

Manages social Rehabilitation and Reintegration programs and activities in prison management

Biometric

This module provides for capture and storage of biometric information regarding prisoners

Administration

Provides functionality for administering the PMIS. It provides super user privileges for creating user accounts, archiving, backup and restoration.

Reports & Documents

This module includes functionality for reporting and documents

Critical Feature

Complete Automated Sentence Calculation

Auto occurrence book Management

Automated Court Attendance System

Automatic Transfer and Lodger Management

Appeal, Court Attendance and Sentence Integration

Escape and Recapture Management

Biometric integration in Admission, Gate pass, Property and Discharge process

Station wise and prisoner wise property Management

Automatic Lockup Management

Overall integration of Modules

Our USP

Station wise, district wise, region wise and state wise view of lockup, prisoner property on dashboard.

01

02

User wise access of reports to view and track the system.

Workflow driven to access and approve the systems.

03

04

Architecture which can support multiple prisons station management.

Automatic sentence calculation, lockup management, gate management, Court management, Transfer & lodger process.

05

06

Notification and alert for all process.

Multi level approval and security.

07

08

Integrated Application for complete automation of the Prisons Management Information System.
